Amendments to the Specification:

Please replace paragraph beginning at page 23, line 20, with the following

amended paragraph:

For example, in the case where the requested network link is the network

link A, if the personal digital assistant 100 fails to establish the network link A 40,

the personal digital assistant 100 attempts to establish the network link B 50

based on the order specified in the alternative network link designation 40A.

Then, if the personal digital assistant 100 fails to establish the network link B 50,

the personal digital assistant 100 attempts to establish the network link D 70

based on the order specified in the alternative network link designation 40A.

Moreover, if the personal digital assistant 100 fails to establish the network link D

70, the personal digital assistant 100 attempts to establish the network link C 60

70 based on the order specified in the alternative network link designation 40A.

Thus, the user is able to chain together a list of alternative network links for the

personal digital assistant 100 to attempt in case the requested network link

cannot be established. It is possible to proceed in a loop by attempting again to

establish the network link A 40 if the network link C 60 70 cannot be established.

The personal digital assistant 100 proceeds in a similar manner in the case

where the requested network link is the network link B 50, the network link C 60,

or the network link D 70.
